[P]: Proficient, [I]: Intermediate, [L]: Learning

- **Web Development Languages:** [P] HTML, CSS, JavaScript; [I] TypeScript
- **Programming Languages:** [I] Java; [L] Python
- **Frameworks:** [P] React.js, Bootstrap; [I] Tailwind CSS, Node.js; [L] Express.js
- **Tools & Platforms:** [I] Git, GitHub, Netlify, Vercel; [L] Docker, Figma
- **Databases:** [L] MySQL, Firebase
- **Others:** [P] UI/UX design sense, Responsive design, Debugging; [I] REST APIs, Version control, Component-based architecture; [L] Web performance optimization, Testing (Jest)

Experience

Keeshokala

Web-developer intern (1 April 2024 – 31 May 2024)

- Development of the front-end for Keeshokala, an e-commerce platform focused on handloom products and door-to-door delivery.
- Using React.js and Redux, I created a responsive design that worked smoothly on both mobile and desktop devices, ensuring an improved user experience.
- I used JavaScript and jQuery to add dynamic content and interactive features, making the platform more engaging for users.
- I also tested the website for performance issues and optimized it to load faster, which led to a more satisfying user experience.

Projects

Meditail – Healthcare Management System

- Led the development of Meditail, a comprehensive healthcare management system designed to streamline the management of patient records, appointment scheduling, and billing processes.
- Developed a responsive front-end using React.js, ensuring a seamless and user-friendly experience for both healthcare providers and patients across various devices.
- Implemented key features such as real-time appointment booking, patient history management, and automated billing to improve operational efficiency for healthcare institutions.
- Focused on adhering to healthcare regulations and data privacy standards, ensuring the system was both secure and scalable.

Certifications

- Google Analytics Course
- Creative Infographics in Power Point
